

People to People: The Human Side of Implementation

What is the human side of implementation?

Schools are in a state of constant change these days. Children, teachers, and administrators are being asked to think and work in different ways. There is not a school today that does not have at least one major initiative for school improvement. Such initiatives have both a technical and a human side. Both must be addressed if the initiative is to be as successful as possible. This collection of resources will focus upon the technical and human sides of implementation..

What resources are available to practitioners in the collection?
