Transcript #11: Contributing to Your Voice

Slide 1

Your experiences help the Partnership and our members understand issues and perspectives.

Slide 2

Through “Your Voice” we are asking that you let us know how you are addressing the issues within your own context, be it at the local, state or national level; in a school, a district, a community, or within an organization. By sharing with us, we can then share with others and your voice will better inform our work.

Additionally, when you tell us how you are using these materials, we would like to know your reactions and those that you observed as you shared with others, as well as any suggestions for improving them.

Slide 3

Your Voice is easily accessed within any collection. As we look at the collection on Autism, simply scroll to the bottom of the page and click on “Your Voice” to give us feedback.

Slide 4

As simple as that! We would love to hear from YOU.
